

# Enhance your plant's performance with **ValveLink™ Mobile** software

## Designed with you in mind

When Emerson engineers designed ValveLink™ Mobile software, we designed it with your work practices in mind. ValveLink Mobile software allows you to set up, commission, and troubleshoot your control valve assembly with ease and mobility never experienced before.

## It's Mobile

ValveLink Mobile software goes where you go. Installed on your intrinsically safe 475 or 375 Field Communicator or on your Bluetooth® enabled smartphone, you can take it into the hazardous areas where your FIELDVUE™ digital valve controllers are located!

*ValveLink Mobile software goes where you go and enhances the performance of your valves with just the touch of a finger!*

## It's fast and easy to use

With no special training required, you can quickly navigate the intuitive, modern interface with easy-to-use touch screen icons to manage your control valve assembly. With a touch of these icons, you can:

- Set up and calibrate your valve assembly
- Monitor status and alerts
- Stroke the valve
- Perform a step test
- Run a valve signature
- View and save diagnostic tests

## Improve your asset management

Enable workers productivity and improve your asset management with the seamless integration of your field diagnostics into your AMS™ ValveLink SNAP-ON™ or ValveLink Solo software.

## Improve your plant's performance

- **Improve plant reliability** with field access to diagnostics that verify proper valve performance.
- **Reduce maintenance** time with rapid setup and calibration.
- **Increase uptime** by quickly troubleshooting in the field.

## Bringing you these advantages:

**Ease of use** - The modern touch screen with large icons make navigation easy on your 475 or 375 Field Communicators or any smartphone with Windows Mobile 5.0 or newer.

**Rapid integration** - You can quickly integrate your field data to AMS ValveLink SNAP-ON and ValveLink Solo with Bluetooth wireless file transfer.

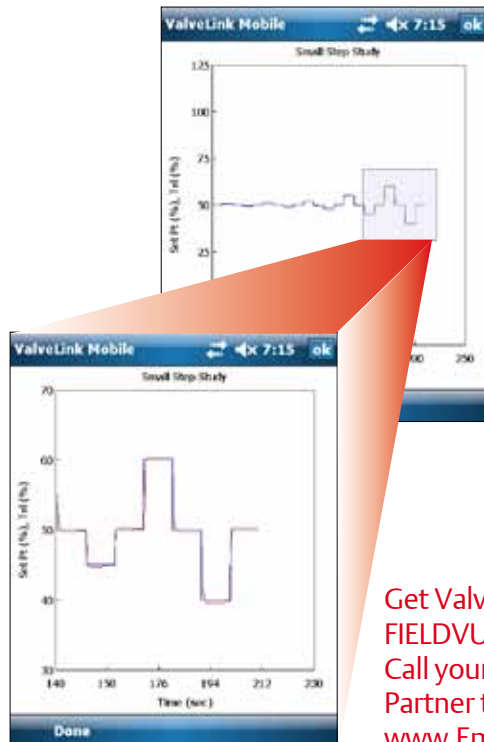

**Enhanced diagnostic capabilities** - We've enhanced diagnostic capabilities to improve your control valve performance. Just a few of these capabilities are shown below.

*Bluetooth on your smartphone and a Bluetooth HART® modem enable safer and more convenient access to valves, especially hard to reach valves.*

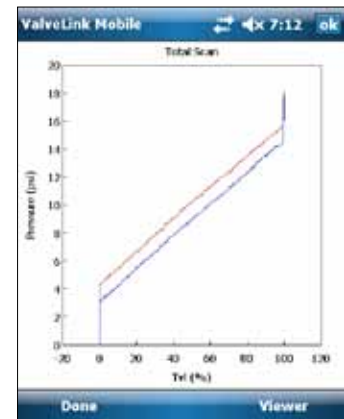

**Setup Wizard** - Setup Wizard guides you step-by-step through configuration and calibration.

**Step Response** - Pre-formatted step tests verify proper valve performance. Rubberband graph to zoom in for a detailed analysis.

**Valve Signature** - Validate proper valve installation for a trouble-free startup.

Get ValveLink Mobile software to access your FIELDVUE digital valve controllers today! Call your local Emerson sales office or Local Business Partner to discuss ValveLink Mobile software or visit [www.EmersonProcess.com/Fisher](http://www.EmersonProcess.com/Fisher) to learn more.
